

**EDINBURGH
AIRPORT
WATCH**

**Campaigning to make our homes and open spaces peaceful again.
Helping to make local voices heard loud and clear above the noise.**

We strongly oppose Edinburgh Airport's proposal for new flight routes: these are not justified for growth, capacity or economic reasons.

We are concerned that the Second Stage Consultation contains multiple flaws.

Edinburgh Airport has ignored our voices so far. 71% of the respondents in the first stage consultation in West Lothian said NO to new routes.

We urge you to reject ALL these proposals for new flight paths – that the airport does not need and we said we don't want.

EAW is campaigning for a ban on night time flying at Edinburgh Airport and a reversal of the massive switch of jet flights between departure routes from 2015 – which has affected tens of thousands, burns more fuel, and has been continually denied by the airport.

To the Chief Executive of the Civil Aviation Authority

Dear Mr Haines,

As a local resident I am very concerned about the new flight paths proposed by Edinburgh Airport for my community and others.

My main concerns are:

Aircraft noise

I strongly object to new flight paths over my community

Tranquil, rural areas and open spaces must be protected.....

I wish to say **No!** to planes flying at night

I have other concerns _____
